SUPPLEMENT TO
REPORT NO.

25X1

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50 U.S.C. 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. The central office of the Sand and Gravel Company in Wroclaw, called the Wroclaw Institute for the Exploitation of Ores (Wroclawskie Zaklady Eksploatacji Kruszywa), acts as a purely supervisory body for the various production branches. (fnu) Sawicki was chief of the central office until late August 1952 at which time he, along with numerous others, was arrested on charges of sabotage. The present director is (fnu) Copija.
2. The following five branches are under the administration of the central office:
- a) State Enterprise for Communications Works No. 5 (Wroclaw Panstwowe Przedsiębiorstwo Robot Komunikacyjnych nr. 5) (PPRK nr. 5), Wroclaw.
 - b) PPRK Opola
 - c) PPRK Malczyce
 - d) PPRK Scinawa
 - e) PPRK Kozle
3. PPRK No. 5, Wroclaw, was originally established for the purpose of processing sand and gravel from the Oder River into building material. Regulating the river was a secondary function of the organization (sic). Sand and gravel are taken from the river bottom under the direction of the Office for Waterway Improvements.
4. PPRK No. 5 has the following equipment:
- 2 steamers - the PULAWSKI, 280 HP, and the MICKIEWICZ, 250 HP, now inactive
 - 6 new tugboats of the Gray type, 120 HP each
 - 1 small steamer, the CIECIALA, 60 HP
 - 6 barges, 200 ton capacity
 - 16 barges, 400 to 500 ton capacity
 - 3 traveling cranes for loading goods, 3,000 kilogram capacity
 - 3 dredgers - the NAREW, the WISLA, and the NURT; the NURT, which has a special attachment for sorting, was recently brought from the USSR
 - 1 steam crane on tracks

- 1 locomotive
- 1 machine repair shop
- 1 carpenter shop

5. Following are the names of the crew of the PULAWSKI:

Captain - Marjan Glaz: about 45 years old

25X1

Pilot - Roman Nuckowski: 30 years old

25X1

Machinist - Karol Zajac: native of Lwow.

Machinist's Asst. - Leon Olek: about 30 years old

25X1

Boatswain - Feliks Bernacki: 27 years old

25X1

Seaman - Jozef Galinski: 28 years old

25X1

6. The following is a breakdown of the assignment of the labor force at PPRK No. 5:

office workers	20
steamer crews (eight men)	16
on the CIECIALA	4
small barges (three men each)	38
large barges (five men each)	80
maintenance of cranes (two shifts)	10
locomotive (two shifts)	4
dredgers (seven men each)	21
machine repair shop	8
carpenter shop	2
unloading crews	10
tugboats (four men each)	24

TOTAL 217

7. Production at PPRK No. 5 is dependent upon the level of the water in the Oder. At high-water time the barges and steamers move easily; at low-water time they are limited in their movement, if they sail at all. PPRK No. 5 generally produces 80 to 100 metric tons of sand and gravel per day. The material is sorted at the labor site, and heavy gravel is shipped to Jaworzno (Q51/Y76) where it is used in the production of reinforced concrete bunkers.
